## CABIN SOLUTIONS FROM ONE-STOP-SHOP

While providing our customers with comprehensive cabin interior services, we guarantee technological excellence through highest quality and safety standards.

With innovative solutions, exceptional service quality and an array of technical skills, we always pursue maximum efficiency.

## CABIN INTERIOR SERVICES

## PAINT SERVICES

Cabin interior paint shops are located at our Istanbul Airport, Ataturk Airport and Sabiha Gokcen International Airport facilities.

We provide painting services in accordance with AMM & CMM references by qualified painters.

## SMART REPAIR SERVICES

We are capable of repairing plastic cabin interior parts in compliance with EASA Part-21 or customer provided documents.

## TEXTILE MANUFACTURING SERVICES

Production capability for carpets, curtains, seat covers, cargo nets and cabin textile components within the scope of EASA PART-21.

In addition, insulation blankets are repaired in accordance with AMM procedures.

The passenger seat covers are washed, cleaned and marked in accordance with related procedures in the wash shop. The mohaired parts are cleaned with machines. Aircraft carpets are cut and overlapped according to the appropriate molds.

In the isolation workshop, necessary procedures are performed for insulation purposes.

## TECHNICAL DRAWING SERVICES

We are able to produce aircraft placards in accordance with EASA PART-145 and EASA PART-21 regulations.
